

Why You Should Attend Youth On The Air Camp!

Katherine Campbell, Jack Roberts
Youth On The Air

Abstract

Why any young ham who's licensed and within 15-25 years old should come to YOTA camp!

Introduction

My name is Katie Campbell (KE8LQR). I'm 16 and currently serve on the working group as well as being the Public Relations Manager for YOTA in the Americas. I've been involved with YOTA since 2022, and have attended camps in Cincinnati, Ottawa, Halifax, and will be at Camp in Denver this summer. I first got involved with amateur radio at ten years old and I quickly obtained by general and extra class licenses at eleven, and learned morse code through the kids classes offered by the Long Island CW Club the next year during the pandemic. Since then, I've remained active in various organizations including YOTA, YACHT, LICW, and a few local clubs.

What do you do during YOTA camp?

During YOTA camp, attendees have the opportunity to use state of the art radio equipment, to attend sessions and learn about things from CW and contesting to high altitude balloon launches and satellites. Most importantly, YOTA camp attendees have the opportunity to network and bond with other young hams, share ideas, mentor each other, and form friendships that will last a lifetime!

What's special about YOTA camp?

- YOTA camp is designed for youth, by youth- nearly every presenter or session leader is a young ham!
- You'll get to learn about a plethora of things you could pursue in amateur radio and opportunities for youth in amateur radio!
- Camp is only \$100 plus your travel expenses for the entire week!
- Whether you are a beginning ham or an experienced ham, there are activities and opportunities for you and your skill level!
